

Oral presentation

Choose one of the topics and prepare an oral presentation with at least 6 sentences. You are to tell your story to your class without reading from your note during the last lesson. (You may refer to your note if necessary but you must be able to tell most of what you want to say without looking)

- 1) introduce your family
- 2) introduce your Chinese study
- 3) introduce one of our friends (朋友 péngyou)
- 4) introduce yourself
- 5) introduce your teacher
- 6) introduce China or the Netherlands
- 7) tell about one of your plans

You may ask your teacher for help with new words or use a dictionary if necessary.

If you are using words that your classmates do not know (for example, your profession), make sure you explain these words to your classmates before you make the presentation. You can do this by writing on the board or distributing a printout.

Tell your classmate briefly what your presentation is about in Dutch/English before you start. This will help them their listening and understand your story better.

During or after your presentation, your classmates and the teacher will raise some questions.

After the presentation, give your teacher a copy of your story so that he/she could correct it for you.
